

MODERN ASPHALT SEALER PIGMENT

Modern Asphalt Sealer Pigment is a high-quality, low embodied CO2 pigment additive for asphalt sealer products. Available in ready-to-use packages for rapid job-site mixing and easy plant-scale production runs.

COLORING

Adds depth of color to asphalt emulsions for optimal visual appeal.

DISPERSION

Easy to disperse pigment allows simple integration into base asphalt sealant.

FORM & PACKAGING

Available in dry powder or pre-emulsified aqueous solution

RECOMMENDED APPLICATIONS

- Asphalt emulsion sealers
- Slurry seals
- Fog seals
- Tack coats
- Chip seals

BENEFITS

- Beautiful, durable colored pavement
- No negative impacts to workability or finishing characteristics
- Easily adjust color as desired
- Reduce embodied CO2 of asphalt products
