

MODERN HMA BINDER EXTENDER

Modern HMA Binder Extender is a performance enhancing asphalt extender for hot-mix and the production of modified bitumen binders. It is a ready-to-use additive for reducing embodied CO₂. No special equipment required.

EXTENDER

Reduces liquid binder percentage requirements while improving pavement performance and reducing rutting

THERMAL STABILITY

Improves high-temperature performance with no effect on low-temperature stability

UV PROTECTION

Reduces oxidating effect of UV radiation

RECOMMENDED APPLICATIONS

- Low and High Traffic Volume Pavement
- Dense-Graded Asphalt
- Asphalt Shingles

BENEFITS

- Lowers binder cost per lane mile
- Improves binder stability in high temperatures
- No effect on workability or mixing
- Reduces rutting
